EDUCATION

**Sri Lanka Institute of Information
Technology - SLIIT**

Software Engineering Undergraduate
2022 - Now

Siri Dhamma College, Galle

Grade 1 - 13(A/L)
2007 - 2020

IJSE - Institute of Software Engineering

Comprehensive Master Java Developer
2020-2021

TECHNOLOGY STACK

ReactJS, Angular
Node, Express, NextJS,
Tailwindcss, MySQL, MongoDB,
Java, C, C++, Python, Kotlin,
PHP, HTML, CSS, Javascript,
Typescript

ABOUT ME

As a software engineering undergraduate at SLIIT, I am passionate about learning new technologies and applying them to real-world problems. I have completed a Comprehensive Master Java Developer diploma at IJSE, and have gained web development experience working with the MERN stack, Angular, PHP, and MySQL. Additionally, I have skills in mobile application and mobile game design. I have also completed important certification programs related to my career. I am eager to bring my expertise to a forward-thinking organization and continue my professional growth.

PROJECTS

Online Advertising Agency - 1st Year Group Project

We created a web application to enhance user experience in digital advertising section. To integrate that project we use basic technologies like **HTML, CSS, JS** and also the **PHP** for the Backend development. **MySQL** used as the database. Whole project developed according to **MVC** architecture.

Online Hospital Management System - 2nd Year Group Project (S1)

In this project we developed a web application using **Java web based technologies**. **SQL** server helped us to integrate the database. Every member contributed to unique development with **CRUD** operations by covering basic functionalities within the system like registration, login, channeling, doctors filtering, etc.

E-Vehicle Renting System - 2nd Year Group Project (S2)

We had build a web application by using a stack for our ITP module. Our team was able to develop a **MERN** stack project to manage E-Vehicle renting related functionalities. We also use security measures like **JWT authentication** and **role base access controls** to secure our application. I personally learned huge area of **React.js, Node.js, Express.js, Redux** and also the **MongoDB**.

Magic Box - Mobile Game

This individual project stands for Mobile Application Development module. Its covering all aspects related to Android development like ViewModels, Intents, Coroutines, RecyclerView and other layouts, Fragments, Adapters, etc. Also this game implement by using **kotlin** programming language.

CERTIFICATIONS

Comprehensive Master Java Developer

IJSE - Institute Of Software Engineering

Java, Springboot, MongoDB, Angular, Express, Node, HTML, CSS, JS, JQuery
OOP Concepts, JDBC projects, JavaFX, Swing

React

React.js Essential Training - LinkedIn Learning
